ROBERTO ALAN VILLANUEVA GUERRERO
SOFTWARE CONSULTANT | DEVELOPER

WORK EXPERIENCE

Villanosoft – *Software Developer*
2019 – to date

Software solutions to administrative problems. I provide my services as a software developer to small and medium businesses and companies, to automate processes, facilitate tasks and easily manage the day to day activities.

- ➤ Cotizac development, inventory control system in Java language.
- ➤ Preparation of documents with database information in Jasper Reports / Crystal Reports.
- ➤ Automation of administrative processes and tasks.
- ➤ Creating web pages and apps with React and NodeJS.
- ➤ Training users in the use of new technologies.

Auditoría Superior del Estado de Coahuila - *Auditor / Consultant Advisor*
2017 – to date

Management, consulting services and solutions to technical or accounting problems at government entities in the state of Coahuila, all about the financial software in use, towards the compliance of the accounting government law.

- ➤ Project and team management to integrate new modules to the system in use all around the municipalities in state of Coahuila.
- ➤ Implementation of the system in many entities of the state.
- ➤ Accountant and tech consulting.
- ➤ Training to all new partners in government accounting and software in use.

Tintas y Toner Laguna – *Computer Technician*
2014 – 2017

Head of technical area and sales, providing personalized costumer services, carrying out repair work on computer equipment in terms of hardware and software.

- ➤ Costumer service and sales
- ➤ Repair and maintenance of computers
- ➤ Software installation
- ➤ Guarantees control

EDUCATION

Universidad Autónoma de Coahuila – *Accountant Degree*
May 2014 – May 2019

I made the decision to study this degree due to job opportunities for an Accountant graduate. I was able to confirm this was the best decision by the great opportunities, large areas of use and constant enrichment of knowledge by the needs it implies in all business areas.

Universidad Abierta y a Distancia de México – *Software Engineer*
May 2017 – to date

When I entered the labor field I noticed the dependency in software, in addition to the technical knowledge that I already had, it was enough to make the decision to study a second degree focused on obtaining the necessary knowledge on software engineering in search of improving work performance by applying the knowledge acquired.
